

Here are three links to files in Canva. One is for the square ads, one is for the horizontal ads, the third is for the toolkit. Please modify the toolkit to fit your needs.

Here are the instructions once they receive the link:

1. Click on link address to open
2. Once open, go to 'FILE' and select 'MAKE A COPY'

Rename your copy and save it to your Canva:

WebDam link containing graphics that recipients of the toolkit can use if they choose. We have linked the toolkit area where it says "Click here to download graphics" but in case there are any issues:

If you would like to link up your toolkit as we've done in past years making it easy for recipients to click the post they'd like to share and have it populate on X, you can use a tool such as <https://clicktotweet.com/dashboard>.
