

Duurzaamheid in golfbaanbeheer

KLM Open 2018

Duurzaamheid is veelomvattend

Steeds meer verschuiving van de beperkte uitleg van bloemetjes, vogeltjes en bijen. Richting zakelijk en geld verdienen.

creativiteit, innovatie, beter benutten, niet inleveren: kwaliteit leveren, optimaliseren, verbeteren. Kansen zien! En deze pakken.

8-9 hiervan kan golf direct aan bijdragen. Grote kans!

Uitdagingen en kansen

Verwachtingen. Perceptie moet veranderen bij de golfer. De wereld verandert!

Perceptie over golf is niet altijd best. Stereotypen:

Klimaatverandering. Extremen

The EU Water Framework Directive - integrated river basin management for Europe

On 23 October 2000, the "[Directive 2000/60/EC of the European Parliament and of the Council establishing a framework for the Community action in the field of water policy](#)," or, in short, the **EU Water Framework Directive** (or even shorter the WFD) was finally adopted.

The [Directive](#) was published in the Official Journal (OJ L 327) on 22 December 2000 and entered into force the same day. Some amendments have been introduced into the Directive since 2000, and you can download the consolidated version in all EU languages [here](#).

However, even after reading the Directive, you may have still questions, such as: What is this Directive about? What do I need to know about the Directive? What is currently happening in relation to the Directive?

Twelve "Water notes" which aim to give an introduction and overview of key aspects of the implementation of the Water Framework Directive are available to [download in all EU languages](#) !

Sustainable use of pesticides

Directive 2009/128/EC aims to achieve a sustainable use of pesticides in the EU by reducing the risks and impacts of pesticide use on human health and the environment and promoting the use of Integrated Pest Management (IPM) and of alternative approaches or techniques, such as non-chemical alternatives to pesticides. Member States have drawn up National Action Plans to implement the range of actions set out in the Directive.

The [main actions](#) relate to training of users, advisors and distributors of pesticides, inspection of pesticide application equipment, the prohibition of aerial spraying, limitation of pesticide use in sensitive areas, and information and awareness raising about pesticide risks.

Member States must also promote Integrated Pest Management, for which, general principles are laid down in Annex III to the Directive.

The main purpose of this web-portal is to provide:

- key information on the sustainable use of pesticides and
- links to relevant information contained on official websites in the Member States.

There is a [search function](#) to help find the links you are looking for.
